

## **RFQ #755-17Q John Deere Tractor**

---

**Addendum 001  
04/28/17**

1. Could you confirm the Model number X78, and the implements you are looking to use. There might be missing part of the model number. The X7 series is a Riding mower which attachments would be difficult to have them be interchangeable.

**Some implements do not interchange with our existing model; please disregard** "Implements must be interchangeable with existing John Deere equipment which is a Model X78 communicated in the RFQ document". We will accept quotations from alternate brand names if the product is equivalent to or better than the specification, in CMC's sole judgment.
