

RFP #768-17Q Welding Equipment

Addendum 001
Issued 07/28/17

1. There are several different model kits based on the primary function of the DD 2x4 downdraft table that carry significant differences. In order to provide the most accurate bid will the primary process of this unit be for welding or plasma processes?

It will be used mostly for welding.

2. Will there also be, outside of replacement filter cartridges, other specific options required? For example, the Minihelic Gauge that measures a drop in pressure indicating when a filter may need to be changed, or a dust-proof light kit.

No other options for these units.

3. Do you need any of the accessories?

No additional accessories are needed.

4. What voltage does this unit needs to be?

We are looking for the 115v units.

5. How many are you requesting a quote for?

This information is in the posted required Bid Sheet at www.coloradomtn.edu/purchasing.
