

RFP #849-19P Asbestos Abatement

**Addendum 001
Issued April 5, 2019**

1. Under the insurance requirement for Commercial General Liability it states the vendor shall maintain coverage “until expiration of any applicable statutes of limitations.” What is the time frame defined by these statutes of limitations that Commercial General Liability coverage is expected to be maintained after the completion of the project?

It would depend on the claim and the applicable statute.

2. Are any of the dorm rooms on campus available for use during the project?

There may be some limited room availability between July 1st and August 10th. Normal room rate is \$69.00 / night with maximum 2 people per room.

3. Are the shaded areas on the drawings the extent of the overlaying flooring that needs to be removed?

Yes shaded areas indicate required work areas.

4. Is weekend work allowed and covered by consultant?

Work will be allowed on Saturdays with adequate notice given to the GC.

5. Will alternate bid, if accepted, be worked required within the original time frame for the abatement? Or is it added to the end of the base bid calendar?

If we decide to accept the alternate we would release all of the work at one time and extend completion date as (if) needed to accommodate the alternate work.
