

RFQ #887-20Q Trail Bikes

**Addendum 001
Issued March 6, 2020**

1. Please specify the width of tire you are requesting on the 27.5+ trail bike. Most manufacturers have dropped the 27.5+ from their 2020 production line due to slow sales. Please confirm 2019 models (if available) will be acceptable. The other option that might be more cost effective for 2020 is a 29er Hardtail with same specs or Fat bike (snow bike) that is 26" wheel but much wider and taller tires.

[We want the 27.5+ wheel and tire.](#)
